DETAILED ACTION

1. A telephone call was made to Hector Rosa on September 28/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-29, drawn to conversion between different types of modulations for transmission over a wireless link, classified in class 370, subclass 466.
 - II. Claims 29-33, drawn to authentication of a device to communicate with a transmission facility, classified in class 713, subclass 155.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as inter-working for communications between networks that have different protocols. Invention I doesn't requires the specifics of authenticating end users' devices of invention II. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
